

My Pathway(s)

Over the course of the next insert unit , we will be focusing on **language and proficiency target** . Take a few minutes to think about how you will get from where you are now to this end goal and draw your own pathway. You can use any mode you choose (e.g., images, text) to create your pathway.

Now that you have your own pathway created, compare it with that of a classmate.

In what ways are your paths the same?

In what ways are they different?

Is there anything you would like to modify on your pathway based on the ideas of your classmate?
