Transportation Services

David Reesor, Director
541-346-5444

The Transportation Services department coordinates the use of sustainable transportation options and provides parking services for students, members of the faculty and staff, and campus visitors. The department currently maintains approximately 3,200 parking spaces on or adjacent to campus in more than 60 lots and one multilevel underground garage, and operates the university's Access Shuttle, a free, on-campus ride service for students, employees, and visitors with limited mobility.
