The University Testing Center (UTC), a unit of the Division of Student Services and Enrollment Management, schedules, coordinates, and administers a wide range of academic and licensure testing for students and community members. The UTC works extensively with the Accessible Education Center to provide proctoring for students with accommodations. The UTC offers community and student support by offering a wide variety of testing programs such as academic examinations, placement assessments, language assessments, credit by examination programs (CLEP and DANTES), teacher certifications (ORELA and PRAXIS), licensing programs for the Oregon Department of Agriculture and Building Codes Division, admissions exams (GRE, GMAT, MAT, MPRE, and Cambridge Assessments) to name just a few. Students and community members taking online, distance-education courses from other schools and programs are also able to have their examinations proctored at the center. The UTC is always open to offering new academic and licensure exams as requested by the community.

Registration materials and information are available on the website (https://testing.uoregon.edu/) or by e-mailing a request (testing@uoregon.edu) to testing@uoregon.edu. The center is located in E248 University Health Services Building. Tests are administered by appointment. Hours of operation are listed on the website.
