The UO's Department of Cinema Studies offers a one-of-a-kind opportunity to explore every facet of the world of moving images. Students become skilled producers of images as well as responsible consumers and thoughtful critics. While traditional film schools teach students how to make movies, UO cinema students approach film, television and new media from a variety of disciplinary angles and perspectives. Our interdisciplinary department teaches the creative and technical aspects of storytelling as well as the broader historical, philosophical, and geopolitical contexts of this industrial art form.

Because cinema is inherently multidisciplinary, students take a diverse array of courses in history, theory, criticism, and aesthetics as well as in digital production. Students take classes across campus from a variety of departments and programs in the College of Arts and Sciences, the School of Journalism and Communication, and the College of Design.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify, define, and apply the vocabulary used to describe and analyze the aesthetics of media. This vocabulary anchors the analytical (ideological, historical, etc.) and artistic work of the Cinema Studies curriculum.
- Historically and contextually analyze a broad range of media from newspapers to newer media to think critically about its intersections, institutions, functions, and social impacts.
- Show a basic knowledge of cinema which includes film, television, and newer media by identifying and describing the technological, artistic, and cultural histories of media in various national contexts while building researching and writing skills.
- Create, present, and constructively critique narrative films, documentaries, or video art pieces. Students will learn the basics of pre-production, production, and post-production to gain an overview of the film and art making process. Using critical thinking skills, students will develop and refine their creative and technical choices while navigating workflow standards.
- Develop artistic skills in specific areas such as screenwriting, directing, lighting, sound recording, and editing to enhance their creative, theoretical, and technical understanding of moving image production. Students will specialize in a craft that enhances their personal creative voice and critical thinking skills.
- Identify and analyze important structures including economic, industrial, legal, political, or regulatory forces that shape the production, distribution, or exhibition of cinema. Students use critical and creative thinking, writing, and/or research skills to develop analytical projects about cinema.

- Perform critical, formal, and cultural analyses of cinematic texts. Using theories specific to cinema studies, students may identify change and continuities in discourses of the auteur, star, genre, etc., or situate texts within intersectional contexts. Students will use critical and creative thinking, writing, and/or research skills to develop analytical projects about cinema.
- Identify and analyze international/transnational/global modes of production, circulation, and aesthetics, then contextualize them broadly or more specifically according to the nation or region. Students will use critical and creative thinking, writing, and/or research skills to develop analytical projects about cinema.
- Exhibit specialized skills in writing, critical thinking, and/or creative practice through capstone seminars, workshops, and/or professionalization courses. Students may also apply the methods of other disciplines to complement cinematic analyses.

Undergraduate Studies

The department offers bachelor of arts (BA) and bachelor of science (BS) degree programs, consisting of 56 credits divided among four categories: fundamentals, production, core courses, and electives. The major includes the option of graduating with honors.

Courses in the major must be taken for a letter grade, and students must earn a grade of mid-C or better for credit toward the major. At least 28 credits must be taken in residence at the University of Oregon.

Electives [4]		
For a list of courses that satisfy elective requirements, review the course lists at cinema.uoregon.edu/term-course-lists. Two electives are required and may include additional fundamentals, production, and/or core courses.		8
Total Credits		**56**

1 Fundamentals courses (16 credits) introduce majors to three central approaches to cinema studies: historical, social-institutional, and aesthetic. These must be completed before entry into production courses.
- Students must complete Media and Society (J 201), Media Aesthetics (CINE 260M), and two of the three courses in the history sequence, History of the Motion Picture I (CINE 265), History of the Motion Picture II (CINE 266), and History of the Motion Picture III (CINE 267)], which may be taken in any order. Completion of all fundamentals courses is required before taking any production courses.

[2] Production courses (8 credits: 4 from Production A and 4 from Production B) give majors a chance to learn the essentials of media production.

- After completing the fundamentals requirements, students may enroll in a Production A course [Introduction to Production (ARTD 256), Introduction to Narrative Cinema Production (CINE 270), or Introduction to Documentary Production (J 208)].
- After successful completion of a Production A course, students are eligible to register for Production B courses [various topics in production; please see term course list (http://cinema.uoregon.edu/term-course-lists/) (http://cinema.uoregon.edu/term-course-lists) for offerings].

[3] Core courses (24 credits) strengthen students' understanding of cinema as a dynamic, multicultural, and transnational phenomenon. Please see term course list (http://cinema.uoregon.edu/term-course-lists/) for offerings.

- Students must complete six core courses, with at least one from each subcategory: Core A (cinema industries); Core B (theory and criticism); and Core C (national, regional, and transnational cinema).
- Two courses in the core with the CINE subject code (8 credits out of the required 24) are required.

[4] Electives (8 credits) allow students to broaden their exposure to cinema and media studies. These courses are not focused exclusively on cinema but instead study it in relation to other modes of inquiry, including (but not limited to) Asian studies, comparative literature, ethnic studies, folklore and public culture, philosophy, journalism, literary studies, music, Romance languages, and women's, gender, and sexuality studies.
A wide variety of elective courses from a range of departments and programs are available. Additional fundamentals, production, and core courses may also count as elective courses. Elective credit for the major may also be derived from internship and/or independent study.

Honors

The department provides qualified undergraduate majors with options for participating in the honors program. Students arriving in the 2018–19 academic year or earlier may receive program honors at graduation if they have a final cumulative grade point average (GPA) of at least 3.75 in cinema studies course work. Beginning in 2019–20, incoming students must meet this GPA and, in addition, complete a scholarly or screenwriting project that originates from a cinema studies course and is then expanded in a faculty-led project development seminar. An honors college thesis also fulfills program honors requirements.
