Mathematics Minor

The minor is intended for any student, regardless of major, with a strong interest in mathematics. While students in such closely allied fields as computer science or physics often complete double majors, students with more distantly related majors such as psychology or history may find the minor useful.

The flexibility of the mathematics minor program allows each student, in consultation with a mathematics advisor, to tailor the program to his or her needs.

Mathematics and Computer Science majors cannot minor in Mathematics.

Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.

One upper-division course used to fulfill the minor requirements may receive a grade of D (D+ or D or D–).

To earn a minor in mathematics, a student must complete at least 30 credits in mathematics at the 200 level or higher, with at least 15 upper-division mathematics credits; Statistical Methods I (MATH 425) cannot be used toward the upper-division requirement. A minimum of 15 credits must be taken at the University of Oregon.

Code	Title	Credits
MATH courses at or above the 200-level [1,2]		30
15 upper-division MATH credits		

1. Students cannot receive credit for MATH 343, MATH 345M, or DSCI 345M after completing MATH 462.
2. Students may only count one course in MATH 343, MATH 345M, MATH 462, or DSCI 345M toward the minor.
