

Critical and Sociocultural Studies in Education (PhD)

The Critical and Sociocultural Studies in Education (CSSE) doctoral program is a research-intensive program designed for students who want to work in academic or other research and professional development careers. It focuses on the need to create more just, equitable, and inclusive schools. The program provides a comprehensive approach to educational research that considers the consequences of contemporary educational practices, questions the assumptions underlying educational reform programs, and develops alternative visions for what education can be.

Admission

The program is small—fewer than 10 students are typically admitted every two years. Applications are accepted from early fall through mid-January for admission in odd-numbered years. The next cohort will be admitted for Fall 2027. Application details are available online (<https://education.uoregon.edu/csse>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate preparation for positions as higher education faculty members or public and private sector education researchers and leaders with knowledge that enables them to advocate for equality and justice and in educational systems.
- Conduct high-quality, high-impact quantitative and/or qualitative research in their chosen field.
- Contribute to scholarship and institutional change initiatives in their field through presentations at national conferences, the publication of articles and books in their area of study, and the writing of grants to support educational change initiatives.
- Demonstrate learning of and respectful engagement in Indigenous epistemologies, methodologies, and the relation of social inquiry to processes of colonization, decolonization, and Indigenous community survivance.
