

MATH 635 HOMEWORK 7
DUE FEBRUARY 27, 2019.
INSTRUCTOR: ROBERT LIPSHITZ

Problems to turn in:

- (1) Hatcher 3.3.2 (p. 257).
- (2) Hatcher 3.3.6 (p. 257). (Hint: consider the quotient map $M_1 \# M_2 \rightarrow M_1 \vee M_2$, not the Mayer-Vietoris sequence; if you use the Mayer-Vietoris sequence, I think you'll need problem 3.3.31, which will be on the homework next week.)
- (3) Hatcher 3.3.8 (p. 257). (The definition of degree is given in problem 3.3.7.)
- (4) Hatcher 3.3.10 (p. 257). (You may assume problem 3.3.9.)
- (5) Hatcher 3.3.15 (p. 259).
- (6) Hatcher 3.3.17 (p. 259).

Review / qualifying exam practice (not to turn in):

- (1) Hatcher 3.3.3, 3.3.4, 3.3.5, 3.3.7, 3.3.9, 3.3.11, 3.3.20.

More problems to think about but not turn in:

- (1) Hatcher 3.3.12, 3.3.13, 3.3.16–18.
